WORK EXPERIENCE

Software Engineer

September 2024 – Present

Department of Defense / National Security Agency (TS/SCI, Full Scope Polygraph)

- Implemented new features and enhancements by collaborating with teams to gather requirements, analyze user feedback, improve application functionality, and user experience.
- Developed and maintained a library of web UI components in mission critical applications responsible for adding and modifying information in databases using React, Material-UI, JavaScript, and TypeScript.
- Spearheaded efforts to increase application 508 compliance scores by 35%, partnering with UX teams, reviewing score sheets to identify and resolve issues, and creating action plans to address gaps.
- Refactored code to include splitting into common sense components and utilities, modifying React components from class to functional, to increase readability and performance.
- Engineered REST APIs utilizing Swagger to test end-points, modify and optimize backend functionality, writing SQL scripts for database queries and utilizing Java for code implementation.

Co-founder, Software Engineer

March 2026 - Present

Waiver Director

- Developed full-stack features for a multi-tenant waiver management SaaS using SvelteKit, Svelte, TypeScript, and Convex, enforcing workspace-level data isolation and server-side authorization.
- Built an automated email follow-up system with a rich-text editor, reusable templates, dynamic content, scheduled Convex jobs, and Resend delivery to support post-waiver customer engagement.

Web Developer

October 2023 - June 2024

Fidelity Transport & Logistics

- Collaborated with cross-functional teams to design, develop, and modernize company websites using JavaScript, HTML, CSS, and WordPress, enhancing functionality, responsiveness, and overall user experience.
- Reduced document processing time by 30% by implementing conditional form logic and automating data exports, streamlining internal workflows while significantly decreasing manual errors.
- Diagnosed and resolved website issues through debugging and performance optimization, improving site stability, responsiveness, and the overall user experience.

EDUCATION

Florida International University, Miami, FL

May 2023

Bachelor of Arts in Computer Science

- 3.66 GPA, Dean's List (2019 - 2023)

SKILLS AND LANGUAGES

Exceptional: JavaScript, TypeScript, React, Java, Python, NodeJS, HTML, CSS, MUI, Git, SQL, MySQL, PostgreSQL, Swagger, Docker, Kubernetes

Proficient: C, C++, Angular, AWS S3, PHP
